EDUCATION

The University of Adelaide

Master of Computer Science

Amrita Vishwa Vidyapeetham

Bachelor of Technology in Computer Science and Engineering

Adelaide, Australia

Jul 2024 - Present (Expected Jun 2026)

Coimbatore, India

Jul 2016 - Jun 2020

SKILLS

- **Languages:** Python, Java, JavaScript
- **Databases:** MySQL, MongoDB
- **Web Technologies:** HTML, CSS, Node.js, jQuery, React
- **Cloud Technologies:** AWS S3, Docker
- **Frameworks:** Spring, Hibernate, Velocity Template, PHP, Django, OpenCV, PyTorch
- **Other:** Rest APIs, Jenkins, Jira, Git, SVN

EXPERIENCE

EduBrite Systems, Inc., now part of LinkedIn - Payroll by Mannara Technologies Pvt. Ltd.

Remote

LinkedIn - Software Engineer/Contingent Worker

Jul 2022 - Jun 2024

- Developed and enhanced QR code functionality using jQuery libraries and integrated it with the test module to prevent cheating, resulting in a **50% reduction** in reported misleading practices.
- Implemented a custom invoice and checkout flow for the Salesforce LMS project, **Trailhead Academy**, using Java, CyberSource, and JavaScript APIs with CSRF tokens, contributing to improved revenue tracking.
- Designed an algorithm using Java and Elasticsearch to recommend the most relevant courses based on course priority to users, resulting in a **2x increase** in course purchases.
- Provided technical support for the Salesforce project, including developing scripts to export data for winding customers, showcasing collaboration and adaptability with cross-functional teams in meeting deadlines.

EduBrite Systems, Inc - Full Stack Developer

Oct 2020 - Jun 2022

- Developed custom web pages for **Salesforce** and **VMware** using Java, Velocity, Spring, Hibernate, JavaScript, HTML, and CSS, aligning with the EduBrite LMS product and improving the learning platform.
- Designed and implemented an email service algorithm in Java for clients, enabling personalized emails and email templates for different actions across the platform.
- Optimized MySQL database queries and schema design to enhance the user experience, resulting in a **30% reduction** in query execution time.

ICU Medical India LLP

Chennai, India

Python Developer Intern

Feb 2020 - Jun 2020

- Automated testing for the **Plum 360 Smart Infusion Pump** using the Pytest framework, improving test reliability for critical clinical functionalities and error handling mechanisms.
- Designed and implemented detailed test scenarios and test cases covering both nominal and edge conditions, ensuring that all software modules, including communication protocols and safety alerts, were thoroughly verified.
- Increased code coverage from **58% to 90%**, significantly enhancing product safety and compliance.

Indian Institute of Technology (IIT)

Dhanbad, India

Research Intern

Apr 2019 - May 2019

- Conducted research at IIT (ISM) Dhanbad on **Wireless Sensor Networks**, designing an energy-efficient routing protocol using Embedded Routing and Oppositional **Grey Wolf Optimization** for mobile sink positioning.
- Improved network lifetime and **reduced energy use**, validated via NS2 simulations and metrics like delay and throughput; published in Wireless Personal Communications ([Springer](#)).

PROJECTS

- **Flappy Bird Agent (Deep Q-Learning):** Developed a reinforcement learning agent with **DQN** to play Flappy Bird by incorporating **frame stacking**, **reward shaping**, and **epsilon decay** for faster convergence.
- **OpenSeaDragon (Open Source Contributor):** Contributed to OpenSeaDragon by enhancing zoom control APIs, improving **DOM event handling**, and refining internal canvas logic for better **extensibility** and **usability**.
- **Regex Pattern Match Using LLMs:** Built a **Django-React** web application that lets users upload CSV/Excel files and automatically detect and replace text patterns using natural language, powered by **LLM-to-regex conversion**.
- **Video Face Detection:** Built a video tool with **OpenCV** and **DeepFace** to detect faces, predict age, and blur underage.
